

GAME ON.

Best-in-class playability with the Venom™ Shaft and its Double Density (DD) Technology engineered by Predator. Four cue models that cover the game from every angle. And the impact-cushioning GTX™ grip that promotes steady, accurate, sweat-free strokes. VX is on a direct route to the hall of fame.

VX 2.1 PLAY/BREAK/JUMP

The all-in-one three-piece cue. Sold with a 21" play shaft and a 21" break/jump shaft. Removable back-end for tight jump shots. Matte finish offers a smooth, burn-free follow-through for break shots. Unique three-piece breakdown makes transporting and storage easy.

Shaft Length: 21"	Painted Shaft: n/a	Standard Weight: 19oz.
Play Tip: Sarin	Finish: Matte	
Break/Jump Tip: Phenolic	Forearm Length: 19"	
	Handle Length: 18"	

VX 2.9 BREAK/JUMP

Three-piece break/jump. Removable back-end for tight jump shots. Matte finish offers smooth follow-through for break shots. GTX™ grip provides extra traction for a strong and steady stroke with every break.

Shaft Length: 29"	*Painted Shaft: 4"	Standard Weight: 19oz.
Taper: Pro	Finish: Matte	
Break/Jump Tip: Phenolic	Forearm Length: 12"	
	Handle Length: 17"	

VX PLAY

Two-piece playing cue. Features the Venom™ Shaft for best-in-class playability and a slick, glossy finish. GTX™ grip has alternating traction zones, so players can rotate the cue to the surface that feels most comfortable in their hand.

Shaft Length: 29"	*Painted Shaft: 2"	Standard Weight: 19oz.
Taper: Pro	Finish: Glossy	
Play Tip: Sarin	Handle Length: 29"	

VX JMP

Two-piece jump cue. Short 41" construction with a removable back-end for tight jump shots. Innovative weight bolt technology allows cue weight to be increased based on personal preference, adding more power to each jump shot.

Shaft Length: 29"	*Painted Shaft: 9"	Standard Weight: 7.5oz.
Jump Tip: Phenolic	Finish: Matte	(adjustable in 0.2, 0.4, 0.5, 0.7 and 0.9 oz increments with weight bolts)
	Handle Length: 12"	

*Positioned above the joint, the painted shafts create a unique look that make these cues appear proportionately different compared to standard cues.

GAME ON.

Best-in-class playability with the Venom™ Shaft and its Double Density (DD) Technology engineered by Predator. Four cue models that cover the game from every angle. And the impact-cushioning GTX™ grip that promotes steady, accurate, sweat-free strokes. VX is on a direct route to the hall of fame.

VENOM® SHAFT

DOUBLE DENSITY (DD) TECHNOLOGY™

DD Technology

Featuring two wood densities in every Venom Shaft, DD Technology inserts a lighter wood into the bore for optimum stiffness and accuracy.

Sarin Tip

With eight leather layers, Sarin is smarter than the average tip. Its last three red layers are revealed to tell you when it needs replacing.

*Diameter: 13mm / Firmness: Medium / Material: Leather
Available on: VX 2.1, VX Play*

Phenolic Tip

The hardness of a Phenolic tip gives extra power for break shots and increased height for jump shots, crucial elements to secure any victory.

*Diameter: 13mm / Firmness: Hard / Material: Phenolic
Available on: VX 2.1, VX 2.9, VX JMP*

SUIT UP IN YOUR SIGNATURE COLOR.

GTX™ GRIP

GTX

This high-tack grip absorbs hand moisture without breaking a sweat. And with the two-toned surface patterns, GTX gives players the perfect mix of traction and cush for a killer grip on the game.

- High-tack GTX
- Low firmness
- High moisture control and shock absorption

DON'T JUST LOCK IT, UNI-LOC IT.

UNI-LOC® MINI-RADIAL® JOINT

Mini-Radial

The Mini-Radial joints tune each cue to its perfect balance point, so the weight of the cue is in the player's hand but not in the joint.

- Aluminum construction
- Light weight and strong
